

Tom is Distracted at School!

Tom is a grade 5 student that is often distracted at school. To improve his concentration, he has started playing a game where he writes a word forward and backward and checks if he gets the same word. Can you help Tom play this game?

Instructions

Determine if a given string is a palindrome and print out `true/false` accordingly. In this scenario, a palindrome is defined as a string that reads the same forward and backward.

e.g. `racecar` should return the output `true`
